

## TYPO3.Neos - Feature # 56163

<b>Status:</b>	Closed	<b>Priority:</b>	Must have
<b>Author:</b>	Tanel Põld	<b>Category:</b>	
<b>Created:</b>	2014-02-20	<b>Assigned To:</b>	
<b>Updated:</b>	2014-10-02	<b>Due date:</b>	
<b>Subject:</b>	tel: links		
<b>Description</b>			
tel: links seem not to be recognized. Certainly very much needed feature in modern web.			
Probably could be solved by basically duplicating the Fluid EmailViewHelper?			

### History

#### #1 - 2014-02-24 23:49 - Nikos Poaros

is it possible to simply add 'tel' to the list of protocols in TYPO3.Neos/Resources/Public/javascript/aloha.js then rebuild the scripts?

This would make it possible to create tel: link tags in text nodes etc using the aloha link button. This already works for mailto:

#### #2 - 2014-02-26 15:30 - Nikos Poaros

- File aloha.js added

i have included the changed file with "tel" added to the protocol.

The Neos link button can now be used to add telephone links as well as mailto etc.

#### #3 - 2014-03-19 14:28 - Simon Schaufelberger

"skype:" would also be another one, and "aim:" and so on, there are lots more. see <http://www.howto-outlook.com/howto/messaginglinks.htm> for a quite long list.

#### #4 - 2014-10-02 12:53 - Lienhart Voitok

- Assigned To set to Lienhart Voitok

#### #5 - 2014-10-02 12:55 - Lienhart Voitok

- Status changed from New to Closed

- Assigned To deleted (Lienhart Voitok)

Moved to JIRA: <https://jira.typo3.org/browse/NEOS-512>
