<b>Has patch:</b>	No		
<b>Subject:</b>	in-line (Condition)ViewHelpers should not evaluate on parsing		
<b>Description</b>	<p>constructions like these,</p> <pre>1{{f:if(condition: anEntity, then: '{anEntity -&gt; f:format.identifier()}' )}}</pre> <p>make the then-branch be evaluated, i.e. invoked, even if the condition evals to false. In most cases this is the exact thing which is intended to be circumvented when wrapping a ViewHelper invocation in a f:if condition.</p>
