TYPO3 Version:	6.2		
PHP Version:			
Complexity:			
Sprint Focus:			
Subject:	BackenUtility::getModuleUrl should respect old modules (not mod.php style)		
Description	<p>In order to allow extension developers to use the same API for 4.5 through 6.2 it should be possible to call getModuleUrl to reliably get the URL to the module, no matter if it is a dispatcher or old style module.</p> <p>In order to do so, all module configuration should be moved from conf.php files to the addModule API, so that we can check that in BackenUtility::getModuleUrl without needing to include a file.</p>		
Subtasks:	Task # 56247: Remove all conf.php files and use the BackendUtility::addModule API to ad...		Rejected
