Revision 8830ba39 - 2015-07-16 13:06 - Benjamin Mack

[!!!][TASK] Remove Cache helper class

The Cache class that acted as a central point when the caching

framework was optionally enabled for 4.3 is now moved

into separate methods.

The duplicate code for creating the database statement is now

moved from the Install Tool to EXT:core to be used in the Extension

Manager as well.

Resolves: #56319

Releases: master

History

#1 - 2014-03-04 21:47 - Christian Kuhn

-1, imho we should keep this separation as long as flow does not merge cacheManager and cacheFactory into one. also, cache is a "connection" class

between cms and flow code, so we should keep it for separation, too.

#2 - 2014-12-09 14:59 - Christian Kuhn

- Status changed from New to Rejected

Imho, this area is not a real bottleneck and it does not make much sense to sacrifice architecture in favor of (negligible) more performance.

For now, I'll close this issue as rejected.

#3 - 2015-06-20 19:06 - Benjamin Mack

- Status changed from Rejected to New

- Target version set to 7.4 (Backend)

- TYPO3 Version changed from 6.2 to 7

We should get this fixed in CMS7.
