typo3/sysext/core/Configuration/DefaultConfiguration.php

```
'LOG' => array(
  'writerConfiguration' => array(
    \TYPO3\CMS\Core\Log\LogLevel::WARNING => array(
      \TYPO3\CMS\Core\Log\Writer\FileWriter::class => array(
        'logFile' => 'typo3temp/logs/typo3.log'
      )
    )
  ),
  'deprecated' => array(
    'writerConfiguration' => array(
      \TYPO3\CMS\Core\Log\LogLevel::WARNING => array(
        \TYPO3\CMS\Core\Log\Writer\FileWriter::class => array(
          'logFile' => 'typo3conf/deprecation.log'
        )
      )
    )
  )
),
```

Because of the LogLevels being configured as constants instead of values the class LogLevel is loaded on every bootstrap of the system even if nothing ever will be logged since config default is loaded everytime
