[TASK] Speed up updating the extension list

The process of updating the TER extension list takes approx 1 minute because the extension manager needs to mark all "latest versions". This is done via a large UPDATE query on fields without indices, additionally this is done in PHP and not in SQL with a simple subselect.

Additionally the SQL file does not set appropriate indices at all, which is also done in this patch.

Releases: 6.2

Resolves: #56354
