Subject:	Redirect after switch-to-user broken

Description

When using the switch-back function on a backend user the redirect is broken.
Switching back works.
Switch-to is also broken

It says the loop would never be finished, a 302 is returned in response. The link is like
typo3/mod.php?M=system_BeuserTxBeuser&moduleToken=f5bd1f6b00a64591337153ba2d83b4526092304e&SwitchUser=5&switcBackUser=1

In a working version the link was like
typo3/mod.php?M=system_BeuserTxBeuser&SwitchUser=5&switchBackUser=1

So i guess the token can not be validated and causes a redirect.

Could be caused by (assumed from commit message): 6e9e545

[BUGIFX] Fix Redirect after switch-to-user

The compatibility layer introduced in #55809
causes trouble with the user switch feature.

User switch intentionally redirects to index.php
but the compatibility layer kicks in and redirects
back to the user module, finally leading to an
endless redirect.

This can be resolved by checking for modules which
have been changed and need that compatibility layer.

Resolves: #56364

Releases: 6.2
