Complexity:	no-brainer		
Sprint Focus:			
Subject:	creation on new pages have broken permissions (perms_groupid set wrong)		
Description	<p>When a regular (non admin) user creates a page in a workspace the page will not have proper permissions as the owning group(perms_groupid) is not assigned correctly.</p> <p>perms_groupid (group ownership) should be based on:</p> <ul style="list-style-type: none">- the first(default) usergroup of the backend user (failing!) OR- the usergroup that is set in TSconfig (works!) <p>(Currently perms_userid and perms_groupid are not covered by the functional tests)</p>

[BUGFIX] Group permissions for new pages are not set

This is a regression to #54085 which accidentally converted a strcmp() to !==.

Resolves: #56393

Releases: 6.2
