TYPO3 Version:	6.2		
PHP Version:			
Complexity:			
Sprint Focus:			
Subject:	Remove old wizard scripts		

Description

Keeping the old wizard script would not solve
the CSRF attack vector as they could still
be referenced in this kind of attack.

Because of that, we remove them now.

This change provides a backwards compatibility
layer in FormsEngine which takes care of rewriting
URLs which have been referenced in TCA.

It will however break code which link to the
old scripts directly in other places.

[!!!][SECURITY] Remove old wizard scripts

Keeping the old wizard script would not solve
the CSRF attack vector as they could still
be referenced in this kind of attack.

Because of that, we remove them now.

This change provides a backwards compatibility
layer in FormsEngine which takes care of rewriting
URLs which have been referenced in TCA.

Also the priority is changed in code. This means
that extension authors can reference both
configurations to stay compatible with older
TYPO3 versions.

It will however break code which link to the
old scripts directly in other places.

Resolves: #56454

Releases: 6.2
