Subject:	Light colored UI switch		

Description

Idea comes from mr. Twisk "Question for you, is it possible to get rid of the dark background and show a white layout? The dark background during editing hurt's my eyes.. ".

As many people find dark on light background easier for the eye it would be nice to have switch for dark vs light UI skin. Grouping classes in CSS for colors and maybe even putting into separate CSS file would make it rather easy to come up with a different skin coloring.

Adobe has it similar in it's tools.
Here's what Pixelmator users talk about dark interface: http://support.pixelmator.com/viewtopic.php?f=4&t=7630

All in all would be nice to have switchable alternative in user settings.

History

#1 - 2014-10-02 12:42 - Lienhart Woitok

- Assigned To set to Lienhart Woitok

#2 - 2014-10-02 12:46 - Lienhart Woitok

- Status changed from New to Closed

- Assigned To deleted (Lienhart Woitok)

Moved to JIRA: https://jira.typo3.org/browse/NEOS-509
