

Core - Bug # 56499

Status:	Closed	Priority:	Should have
Author:	Andreas Fernandez	Category:	DBAL
Created:	2014-03-03	Assigned To:	Andreas Fernandez
Updated:	2015-07-30	Due date:	
TYPO3 Version:	6.2		
PHP Version:			
Complexity:			
Is Regression:	No		
Sprint Focus:			
Subject:	SqlParser: Subselect in WHERE not supported		
Description			
Hello TYPO3 team,			
updating the extension list after deleting "1.extensions.xml.gz" and "1.mirrors.xml.gz" results in a catchable fatal error:			
<pre>PHP Catchable Fatal Error: Argument 1 passed to TYPO3\CMS\Dbal\Database\DatabaseConnection::_quoteWhereClause() must be an array, string given, called in typo3/sysextdbal/Classes/Database/DatabaseConnection.php on line 1214 and defined in typo3/sysextdbal/Classes/Database/DatabaseConnection.php line 1702</pre>			
After some investigation I found out that the error is triggered by the following part:			
<pre>integer_version=(SELECT MAX("integer_version") FROM "tx_extensionmanager_domain_model_extension" "b" WHERE "b"."repository" = 1 AND "a"."extension_key" = "b"."extension_key") AND repository=1</pre>			
in typo3/sysextdcore/Classes/Database/SqlParser.php in line 1210.			
The used regex does not support any subselect in WHERE clause, so the following parse error is triggered:			
<pre>No operator, but parsing not finished in parseWhereClause()</pre>

related to Core - Bug # 56354: Speed up updating the extension list		Resolved	2014-02-26

History

#1 - 2015-01-24 22:27 - Mathias Schreiber

- Assigned To set to Andreas Fernandez
- Target version set to 7.3 (Packages)

Congratulations on winning that one ;-)

#2 - 2015-06-15 17:45 - Benjamin Mack

- Target version changed from 7.3 (Packages) to 7.4 (Backend)

#3 - 2015-07-30 12:47 - Riccardo De Contardi

- *Status changed from New to Closed*

The resolution of the issue #60857 had also solved this, so I close it.
