

## TYPO3.Neos - Task # 56531

Bug # 54392 (Closed): Installation issues

|                    |  |                     |             |
|--------------------|--|---------------------|-------------|
| <b>Status:</b>     | Closed   | <b>Priority:</b>    | Should have |
| <b>Author:</b>     | Bastian Waidelich  | <b>Category:</b>    |             |
| <b>Created:</b>    | 2014-03-04   | <b>Assigned To:</b> |             |
| <b>Updated:</b>    | 2014-10-02   | <b>Due date:</b>    |             |
| <b>Subject:</b>    | Warn user when memory is about to exceed   |                     |             |
| <b>Description</b> | <p>Some of the hard-to-debug installation issues originate in a low <code>memory_limit</code> (see #54347 for example).</p> <p>We should detect low <code>memory_limit</code> setting (or even better: detect limit dynamically using <code>memory_get_usage()</code>) during the Neos setup</p> |                     |             |

### History

---

#### #1 - 2014-03-19 14:37 - Simon Schaufelberger

and maybe also during runtime when people upload files for a full harddrive? that happened to me already!

#### #2 - 2014-10-02 11:39 - Philipp Hanebrink

Moved to Jira: <https://jira.typo3.org/browse/NEOS-506>

#### #3 - 2014-10-02 11:39 - Philipp Hanebrink

- Status changed from New to Closed
