2015-08-04

```
"type": "package";

"name": "robrichards/xmlseclibs",

"version": "1.3.1",

"dist": {

"url": "https://xmlseclibs.googlecode.com/files/xmlseclibs-1.3.1.tar.gz",

"type": "tar"

},

"autoload": {

"files": ["xmlseclibs.php"]

}

}
```

As you can see it's possible to load the package without composer.json. Adding it manually results in a working installation;)

FLOW should not rely on a composer.json in each package directory

## History

## #1 - 2014-03-20 14:38 - Kay Strobach

imho there are 2 options to solve that:

- 1. create composer.json automatically (would dislike that)
- 2. have a fallback and assume some values.

the problem is, that this is supported by composer, but flow struggles with it:(
