<b>Subject:</b>	Visual response while starting uploading		
<b>Description</b>	<p>I miss a visual response while starting uploading a file in media-module. Firstly it wasn't clear that the upload has already started. Perfect would be a simple animated gif with a small text like: Waiting for transferring media, or something else like the already in plupload integrated filelist/progress.</p> <p>Or is there already something like that, but I can't see it?!</p> <p>When this visual response is still an open task, I could offer to try to integrate such a functionality.</p>

Hey Thomas

This would be nice a addition and you're very welcome to come up with a solution. If you need some help designing or figuring out a concept feel free to get in touch in #typo3-coreteam on Freenode
