

TYPO3.Flow - Bug # 56598

Status:	Resolved	Priority:	Should have
Author:	Frederik Vosberg	Category:	Security
Created:	2014-03-06	Assigned To:	Bastian Waidelich
Updated:	2014-06-18	Due date:	
PHP Version:			
Has patch:	Yes		
Complexity:			
Affected Flow version: Git master			
Subject:	Absolute URI for WebEntry		
Description			
Hi,			
I tried to configure an absolute URL for my entry point of a security provider. But it can't handle the absolute uri.			
provider: MyProvider			
entryPoint: 'WebRedirect'			
entryPointOptions:			
uri: http://www.absolute-url.de/			
I have created a patch.			
Flow version: 2.1.1

[BUGFIX] Fix support for absolute URIs in WebRedirect options

Fixes support for authentication provider redirects to external domains.

Background:

If a ``WebRedirect`` is configured with a relative URI like::

```
entryPoint: 'WebRedirect'  
entryPointOptions:  
  uri: 'some/path'
```

The ``Location`` header gets properly prefixed with the current base URI.

But due to a typo this happened as well for absolute URIs.

Note: using the "uri" option for internal redirects is deprecated, use the ``routeParts`` option instead for those.

FYI: The "uri" option of the WebRedirect entry point is deprecated. See

<http://docs.typo3.org/flow/TYPO3FlowDocumentation/TheDefinitiveGuide/PartIII/Security.html#authentication-entry-points>

Can you please explain why you need an absolute URI here?

#3 - 2014-03-07 13:55 - Frederik Vosberg

Because I want to redirect to an external URL. And the way through a controller would be too much. Is there another way?

Fair enough, but we should detect absolute URIs using `parse_url()` (like we do it in other places, for instance

<https://git.typo3.org/Packages/TYPO3.Fluid.git/blob/HEAD:/Classes/TYPO3/Fluid/ViewHelpers/Link/ExternalViewHelper.php#l65>)

I'll take care of this

I finally got around pushing this one. Sorry, I didn't know that this feature was already (incorrectly) implemented. I didn't look at your patch and thought this was a new "feature"..
