

## Getting Started - Bug # 5661

<b>Status:</b>	Closed	<b>Priority:</b>	Should have
<b>Author:</b>	Romeo Disca	<b>Category:</b>	Content / Instructions
<b>Created:</b>	2009-12-07	<b>Assigned To:</b>	Karsten Dambekalns
<b>Updated:</b>	2010-10-20	<b>Due date:</b>	
<b>Subject:</b>	Fatal error: F3\PHP6\Functions::getT3LibCS()		
<b>Description</b>	<p>I tried to walk through the tutorial and received following error message:</p> <pre>/var/www/flow-tutorial\$ ./flow3 kickstart package Blog</pre> <p>Fatal error: F3\PHP6\Functions::getT3LibCS(): Failed opening required '/var/www/flow-tutorial/Packages/Framework/PHP6/Classes/../../Resources/PHP/class.t3lib_cs.php' (include_path='/var/www/flow-tutorial/Packages/Framework/PHPUnit/Resources/PHP:./usr/local/lib/php') in /var/www/flow-tutorial/Packages/Framework/PHP6/Classes/Functions.php on line 0</p> <pre>line 183: if (!class_exists('t3lib_cs', FALSE)) { debug:   var_dump(is_file(__DIR__ . '/../Resources/PHP/class.t3lib_cs.php')); line 184: require(__DIR__ . '/../Resources/PHP/class.t3lib_cs.php'); line 185: }</pre> <p>var_dump returns false but the file is located there.</p> <p>i use PHP Version 5.3.1-0.dotdeb.1 with ubuntu.</p>		

### History

#### #1 - 2009-12-08 12:27 - Romeo Disca

```
require(DIR . '/../Resources/PHP/class.t3lib_cs.php');
```

at the top of the document works.

But then run into another error:

```
Uncaught Exception in FLOW3 #1170251400: Could not create directory "/var/www/flow-tutorial/Packages/Application/Blog/"!  
thrown in file Packages/Framework/FLOW3/Classes/Utility/Files.php  
in line 160
```

#### #2 - 2009-12-10 09:39 - Karsten Dambekalns

- Project changed from *TYPO3.Flow* to *Getting Started*
- Target version deleted (1.0 alpha 6)

#### #3 - 2009-12-10 09:41 - Karsten Dambekalns

- Category set to *Content / Instructions*
- Status changed from *New* to *Needs Feedback*
- Assigned To set to *Karsten Dambekalns*

Are you sure the permissions are correct? Did you run `setfilepermissions.sh` with the correct arguments and are the permission now as expected? Those errors sure sound as if you cannot read/write as expected...

**#4 - 2009-12-10 13:06 - Romeo Disca**

Yes, permissions are set as wished.

As I said the require at the top of the file works.

I played around with the permissions and set user to local user and permissions all 777. But I receive the same problem. I tried to debug with `is_dir()` for all of the subpaths but received a false even for directory `/var (/var/www/flow-tutorial/...)` This seems very curious to me.

**#5 - 2010-01-18 10:34 - Karsten Dambekalns**

*- Status changed from Needs Feedback to Accepted*

**#6 - 2010-09-13 15:11 - Karsten Dambekalns**

*- Status changed from Accepted to Closed*

Considering fixed, we don't have the PHP6 package anymore, PHP has been releasing new versions, ...
