

## TYPO3.Flow - Feature # 56639

<b>Status:</b>	New	<b>Priority:</b>	Must have
<b>Author:</b>	Jan Greth	<b>Category:</b>	
<b>Created:</b>	2014-03-07	<b>Assigned To:</b>	Robert Lemke
<b>Updated:</b>	2014-03-07	<b>Due date:</b>	
<b>PHP Version:</b>			
<b>Has patch:</b>			
<b>Complexity:</b>			
<b>Subject:</b>	Implement "getPrivateStorageUriByResource()" for receiving (image-) file URIs		
<b>Description</b>			
<p>As talked about on Flow Mailing List (Thread: [Flow] Extract image EXIF data for resource objects and resize image on upload <a href="#">See here</a>) on August 5th 2013 it would be really handy to have a <code>\$resourceManager-&gt;getPrivateStorageUriByResource(\$resource)</code> method.</p> <p>This is needed for processing imagefiles which are stored by TYPO3.Media Package by libraries/functions like <code>exif_read_data()</code> or with several <code>imagemagick</code> functions.</p> <p>For getting the Exif information now the best way I found is like:</p> <pre>\$exif_array = exif_read_data(\$this-&gt;resourceManager-&gt;getPersistentResourcesStorageBaseUri().\$image-&gt;getResource()-&gt;getResourcePointer()-&gt;getPointer()-&gt;getHash(),'EXIF');</pre> <p>I think this is quite a bit overload and would be much nicer when we could use the API method Robert announced in the thread mentioned above.</p>			

### History

#1 - 2014-03-07 10:06 - Jan Greth

- Project changed from *TYPO3 Flow Base Distribution* to *TYPO3.Flow*
