[BUGFIX] Tests: Improve mocking in IconUtilityTest

The IconUtility tests depend on initialized \$GLOBALS['TBE_STYLES'] and sometimes on initialized \$GLOBALS['TCA']. This dependency is removed by properly setting up needed arrays now, this also makes the tests more obvious and easier to understand.

Additionally, the static cache property introduced with #56110 now uses late static binding, enabling the tests to extend the class and route any static cache changes to an test internal overlay class to not pollute the static property of the base class.
