

TYPO3.Neos - Bug # 56974

Status:	Closed	Priority:	Should have
Author:	Soren Malling	Category:	
Created:	2014-03-17	Assigned To:	Philipp Hanebrink
Updated:	2014-10-01	Due date:	

Subject: Own nodetype: Uncaught TypeError: Cannot call method 'render' of undefined - vie.js:6768

Description

Configured NodeType

TS

```
prototype(Meteko.Homepage:PostList) < prototype(TYPO3.Neos:Menu) {
  #items = ${q(site).find(['instanceof Meteko.Homepage:Post!'])}
  templatePath = 'resource://Meteko.Homepage/Private/Templates/NodeTypes/PostList.html'
  itemCollection = ${q(site).children('blog').children().get()}
}
```

YAML

```
'Meteko.Homepage:PostList':
  superTypes: ['TYPO3.Neos.NodeTypes:Menu']
  ui:
    label: 'Blog Post List'
```

When I place a instance of Meteko.Homepage:PostList on a page the following javascript error is thrown

Uncaught TypeError: Cannot call method 'render' of undefined vie.js:6768

After this, no other content elements can be inserted

Afterward reloading the page, my structure got the element, but it's not being rendered
