[FEATURE] Introduce shadowColumnsForMovePlaceholders property

\$TCA[<table>][ctrl][shadowColumnsForMovePlaceholders] behaves similar to shadowColumnsForNewPlaceholders but is only used for move placeholders.

If shadowColumnsForMovePlaceholders is not defined in particular for a table, but shadowColumnsForNewPlaceholders is defined, then that value is used as a fallback - since that property existed for a longer time already.

Resolves: #56994

Documentation: #56749

Releases: 6.2

#### #1 - 2014-03-17 15:29 - Gerrit Code Review

- Status changed from New to Under Review

Patch set 1 for branch **master** of project **Packages/TYPO3.CMS** has been pushed to the review server.

It is available at <https://review.typo3.org/28473>

**#2 - 2014-03-17 16:22 - Thorsten Kahler**

- Status changed from Under Review to Needs Feedback

Why do we need another config option for move placeholders? What's the difference to new placeholders in this context?

**#3 - 2014-03-17 16:37 - Timo Webler**

Available changes for move placeholder:

- #32967
- <https://review.typo3.org/18107>

**#4 - 2014-03-17 17:07 - Oliver Hader**

The difference is "it is used for move placeholders" only... as written...

The reason for that is the way move-placeholders are overlaid in the frontend.

See <https://review.typo3.org/#/c/27774/> and the accordant CSV tests on sorting/moving things...

For IRRE that's not enough - the action happens in `DataHandlerHook::moveRecord` - `DataHandler::versionizeRecord` (creates version and the new placeholder)

- `DataHandlerHook::moveRecord_wsPlaceholders` (creates move placeholder after everything was processed and remapped (remapStack))

I've applied your patch locally and disable the new `movePlaceholder` property - the TravisCI test fail

- <https://travis-ci.org/ohader/TYPO3.CMS/jobs/20950988> (the expected values are not set, thus misusing the `newPlaceholder` property is not enough)
- <https://travis-ci.org/ohader/TYPO3.CMS/jobs/20951081> (disabled the `DataSet` assertions - thus behaviour in frontend is not as expected)

This change combines the new property for "move" with the old property for "new" as a fallback...  
Thus, one can decide whether to override/disable on demand.
