Subject:	Regression: Query building fails for LazyObjectStorage		

Description

When a LazyObjectStorage is used in an "in" comparison you get a PHP error:

> *Object of class TYPO3\CMS\Extbase\Persistence\Generic\LazyObjectStorage could not be converted to string in typo3/sysext/extbase/Classes/Persistence/Generic/Storage/Typo3DbBackend.php line 542*

I guess this is also a regression of #55167

[BUGFIX] Fix operator "in" for cached queries

This a follow up fix for the extbase query cache. On reusing an already

build query, it was missed to evaluate the multi valued operator and

provide it as array for resolving the parameter placeholders.

Resolves: #57104

Releases: 6.2

And what does happen, if it is a normal object storage? From reading the code it should also fail.

#4 - 2014-03-20 18:52 - Alexander Stehlik

I think it does but I'm not sure. Started digging but did not find the right spot yet :(

Oh, than it **was** that spot. I have already looked at it but i was not sure.

I'll push my first WIP patch in a minute.
