Hi Ernesto,

so this patch should fix only padding of the elements on the right section?

Please take a look also how tooltip (with delete and edit shortcuts) looks like on Kubuntu 14.04 @ Chromium

Can you explain what is wrong with them and maybe a screen how it looked before? It looks "ok" to me.

Ernesto the tooltip issue is not related to this list styles.

If we talk what is wrong with them please take a look at your screenshot (trash and pencil icons are both inside the tooltip and its background) and on the one i posted you can see that there is bigger space between icons and pencil is rendered outside tooltip background (the tooltip container is wider so the background starts to repeat i think).
