Is Regression:	No
Sprint Focus:	

Subject:	First Install lists directory errors: confusing

Description

First installation has no directories yet. Even if they could be created there are errors shown to the user. This is ugly!

[BUGFIX] First install lists directory errors

For a first installer the directory structure is empty and the
first step will try to create it. We do not need to show these
as errors to the user, only if the root directory cannot be
written.

To achieve this we raise "Warnings" instead (which are
not shown in first step). To keep the Folder Structure menu
item on the left menu in the Install Tool showing a red badge
for non existing directories, we change this to also include
Warnings.
