<b>Subject:</b>	Use of cf_extbase_typo3dbbackend_queries results in fatal		
<b>Description</b>	<p>After upgrading to RC1 and creating cache table cf_extbase_typo3dbbackend_queries (and _tags), queries on fe_users now fatal.</p> <p>My query on fe_users (findAll or findByUsergroup, does not matter) fails while mapping fe_users to FrontendUser objects because the WHERE clause reads:</p> <pre>fe_groups.uid = '6','8' AND fe_groups.deleted=0 AND fe_groups.hidden=0</pre> <p>see the "=" with two values</p> <p>This happens as soon as it tries to map a fe_users with 2 fe_groups associated (6 and 8)</p>

#### Revision ed50510a - 2014-03-23 18:08 - Xavier Perseguers

[BUGFIX] preparseQuery wrongly computes cache hash of a query

preparseQuery only takes query's parameters to compute its hash but not the operators used. As such, those two queries result into the same cache hash:

```
SELECT * FROM fe_groups WHERE uid = :uid
```

```
SELECT * FROM fe_groups WHERE uid IN (:uid)
```

Fixes: #57173

Releases: 6.2
