Sprint Focus:	

Subject:	Refactor element dependency resolving

Description

Dependency element resolving of nested data structures currently is used in CommandMap only. However the logic can be used for other tasks as well, like e.g. showing nested structures in the workspaces module. Callback methods are extracted to the new ElementEntityProcessor to reduce further code duplication.

[TASK] Refactor element dependency resolving

Dependency element resolving of nested data structures currently
is used in CommandMap only. However the logic can be used for
other tasks as well, like e.g. showing nested structures in the
workspaces module. Callback methods are extracted to the new
ElementEntityProcessor to reduce further code duplication.
