Is Regression:	Yes		
Sprint Focus:			
Subject:	Can't inherit abstract function TYPO3\CMS\Extbase\Persistence\ObjectMonitoringInterface::_memorizeCleanState()		
Description			
When changing from TYPO3 6.2rc1 to TYPO3 6.2rc2			
Adding an Extbase plugin like this:			
<pre>30 = USER 30{ userFunc = TYPO3\CMS\Extbase\Core\Bootstrap->run extensionName = TcBase vendorName = TYPOCONSULT controller = Page pluginName = Base switchableControllerActions{ Page{ 1 = show } } }</pre>			
gives me Can't inherit abstract function TYPO3\CMS\Extbase\Persistence\ObjectMonitoringInterface::_memorizeCleanState()			
It worked like a charm in TYPO3 6.2rc1			
Any clues?

[BUGFIX] Extbase: Methods are inherited twice

Change #57031 introduced two methods in DomainObjectInterface, which are already present in ObjectMonitoringInterface.

Undo that change.

Resolves: #57271

Releases: 6.2

Comment there:

| *I recently encountered this Problem as well. For me it helped upgrading from PHP 5.3.8 to PHP 5.3.28.*

Some other comment:

| *... showing that it is fixed since PHP 5.3.9.*

Ok found the real problem.

AbstractDomainObject implements DomainObjectInterface, \TYPO3\CMS\Extbase\Persistence\ObjectMonitoringInterface

Both interfaces now contain `_memorizeCleanState()` and `_isDirty()`.

Will remove these again from `DomainObjectInterface`.
