Sprint Focus:			
Subject:	RelationHandler->purgeItemArray() should use isTableWorkspaceEnabled check		

Description

The purgeItemArray method produces database errors ("Unknown column 't3ver_oid' in 'field list'") if there are mm relations without workspace support.
A check for BackendUtility::isTableWorkspaceEnabled solves the problem.

[BUGFIX] Check WorkspaceEnabled for MM field related table

If you try to edit a MM field associated to a table which doesn't use
versioning (t3ver_* fields are missing) you get a database error.
This patch adds a check if versioning for the table is enabled.
