Subject:	Introduction package does not install/load any pages: typo3 6.2.0

Description

Hi,

I tried to install from brand new typo3 6.2 installation the Introdcution package but it fails.

When I look to the log file I see the following:

Type   Action   Details

and a lot more Warning of the last warning in the log.

I tried it a few times: always the same error.

During the install bootstrap_package and realurl gets loaded and some "stuff" gets created on file system, but page tree remains empty.

I am using latest version of XAMPP on localhost.

Best regards

Eckard.

Hi,

I have the same problem. The introduction-package installs bootstrap_package and realurl and then it tries to install a t3d via importT3DFile
which stops the installation of the introduction-package. I have a pagetree but the install is incomplete and files are missing.

Hi,
started with new typo3 6.2.1
General install works really good in just a few minutes.

Installation of Introduction Package still does not work. I get the package installed and was able to see the success message of installation but still in
log file same errors occur and no pages get generated.

Best regards
Eckard.

Still persists in 6.2.6.

Environment:
 - Windows 7
 - wampserver 2.5(same in xampp)

In Ubuntu the distribution is installed correctly.

Hi,

since it seems that I as starter of the task can not change the status, I created a new task 62574 under the following link:
