[BUGFIX] Backup of LocalConfiguration.php missing on update

If you update from a 6.x installation there should be a backup of the old, unmodified LocalConfiguration.php as it's getting changed during PackageStates.php extraction. This is prevented with commit e755bcd as a check for the PackageStates.php file was introduced, which might not be available at this point during upgrade.

Resolves: #57458

Releases: 6.2
