[BUGFIX] TceformsUpdateWizard shows up too often

After successfully migrating a field, the field is not added to the list of finished fields, due to a superfluous check.

Running wizard again finally adds the field to the finished list as the condition is fulfilled, but the additional run does not do any useful work anymore.

Fix this by adjusting the condition to safe the extra run.

Resolves: #57497

Releases: 6.2

Beside of the issue, that it is shown too often, I dislike that you go to next wizard without further notice that this wizard needs to run again.

**#5 - 2014-04-08 10:06 - Markus Klein**

That's why I'm preparing a patch that will recall the wizard as long as there's work to do. That will also fix problems with big installations where the conversion can't be done in one request.

But that requires some prework:

- Different handling of errors in the wizard
- Installer needs ajax handling, so I can show a progress in the Install Tool
- etc.
