Core - Bug # 57574

Status:	Accepted	Priority:	Must have
Author:	Markus Klein	Category:	7 Install Improvements
Created:	2014-04-02	Assigned To:	
Updated:	2015-07-13	Due date:	

TYPO3 Version:	6.2
PHP Version:	
Complexity:	
Is Regression:	No
Sprint Focus:	
Subject:	TceformsUpdateWizard does not tell the user about the log file

Description

TceformsUpdateWizard generates a log file for failed migrations.

The location of this log file is never revealed to the user.

Path is: /typo3temp/logs/typo3.log (FileWriter of the Logger)

This is also the case for RteMagicImagesUpdateWizard.

I would say it is not the job of a particular UpdateWizard to tell about the log, but rather the install tool itself.

#2 - 2014-04-02 21:28 - Steffen Müller

I'd propose to configure a dedicated log file to cover any logRecord which is triggered inside of typo3/sysext/install:
    typo3temp/logs/install-tool.log

What do you think?

Could be added to DefaultConfiguration.php with:

```
'LOG' => array(
    'TYPO3' => array (
        'CMS' => array(
            'Install' => array(
                'writerConfiguration' => array(
                    \TYPO3\CMS\Core\Log\LogLevel::DEBUG => array(
                        'TYPO3\\CMS\\Core\\Log\\Writer\\FileWriter' => array(
                            'logFile' => 'typo3temp/logs/install-tool.log'
                        ),
                    ),
                ),
            ),
        ),
```

```
            ),
        ),
```

Then announce this file and the related log configuration at a prominent place in install tool.

What could be a good place for this announcement?

#3 - 2014-04-02 21:44 - Steffen Müller

One could argue that adding a random suffix to the filename like deprecation_3f11ecba79.log

I think we should discuss this before.

#4 - 2014-04-02 22:34 - Markus Klein

Steffen, thanks a lot for taking care about this. Your proposal sounds great.

Prominent place would be the overview of the upgrade wizards.
I don't mind the whether we have a file suffix or not.
