<b>Sprint Focus:</b>			
<b>Subject:</b>	Optimize ReflectionService Cache handling		
<b>Description</b> A the moment the ReflectionService cache handling has some drawbacks: <ul style="list-style-type: none"><li>- it doesn't support nested Extensions (#12518)</li><li>- the cache data for main extensions (e.g. fluid/extbase) are redundant cached and e.g. are not reused from different extensions on one page (performance)</li><li>- some Reflection evaluation is missing, that it could be used by the ClassInfoFactory (performance)</li></ul>
