Sprint Focus:			
Subject:	FE-User Session is deleted on login attempt / Login fails if Session is not empty		
Description	<p>I have a shop-extension - developed on 6.1 with extbase - and now installed on a 6.2 installation.</p> <p>This shop extension saves some data like the basket-object into the Session of the current FE-user (user is not logged in until now).</p> <p>If the user now tries to login via felogin (with at least one product in basket), the login always fails the first time.</p> <p>After it failed the session data is empty (basket cleared) and the fe-user cookie is deleted.</p> <p>If the user now tries to login a second time - it works.</p>

Although this has been reported earlier, there're already more comments in the duplicate #57751.

I propose to continue there.
