

## TYPO3.Flow - Feature # 57763

<b>Status:</b>	New	<b>Priority:</b>	Should have
<b>Author:</b>	Kay Strobach	<b>Category:</b>	
<b>Created:</b>	2014-04-09	<b>Assigned To:</b>	
<b>Updated:</b>	2014-04-09	<b>Due date:</b>	
<b>PHP Version:</b>			
<b>Has patch:</b>	No		
<b>Complexity:</b>			
<b>Subject:</b>	Allow controller / package / action as params in \TYPO3\Fluid\ViewHelpers\Form\ButtonViewHelper		
<b>Description</b>			
formaction is already there in flow button viewHelper, but you can't easily use package + controller + action to send the form. So we need to add a way to calculate the formaction, formenctype formmethod and these things automatically.			

### History

#### #1 - 2014-04-09 11:55 - Kay Strobach

most of the logik can IMHO be taken from TYPO3.Fluid/Classes/TYPO3/Fluid/ViewHelpers/Link/ActionViewHelper.php  
the form properties should be taken from the form

Hi Kay,

| formaction is already there in flow button viewHelper, but you can't easily use package + controller + action to send the form.

What about

```
1 <f:form.textfield formaction="{f:uri.action(action: 'foo')}" />
```

#### #3 - 2014-04-09 12:41 - Kay Strobach

know that, but why not supporting it nativly? - it's easier to read then ...

Mh, IMO it's not worth adding complexity. But if someone wants to provide a patch and people think it's useful I'm the last to stop it ;)
