Sprint Focus:				
Subject:	filelist and file wizard very	y slow for more file than usual		
Description				
having just some file	s more than average slows do	own filelist module and much more th	e file wizard attache	d to file-fields of CEs.
in filelist module TYP	O3 always displays the numb	per of files in a folder, which is very e	pensive if there are	e.g. 200 folders with
around 2000 files ea		····, ···,		3
in the file wizard non	e such number is displayed b	ut the display is much more slower.		
it is not the filesysten	n: you may enter the comman	nd 'Is -I tester/*' in a shell which is sho	wn in less than a mi	nute ('ls tester/*' just takes
15 seconds)				
example:				
•	ed file 'crate_files.sh' into you	r fileadmin/ folder ad execute it.		
download the attache		r fileadmin/ folder ad execute it. in/tester/dir/199/dummy_31415.png	nto an image CE.	
download the attache afterwards try to sele	ct the new copied file fileadm		nto an image CE.
