

TYPO3.Flow - Bug # 57815

Status:	New	Priority:	Should have
Author:	Stephen Bungert	Category:	Resource
Created:	2014-04-10	Assigned To:	
Updated:	2014-04-10	Due date:	
PHP Version:			
Has patch:	No		
Complexity:			
Affected Flow version: Flow 2.0.0			
Subject:	Invalid resources are saved in the persistent resources folder		
Description			
<p>I have a file type validator for a property of type \TYPO3\Flow\Resource\Resource.</p> <p>The error message is shown in the front end, for example, that a zip file was uploaded when the file should be jpg or png.</p> <p>But flow has also moved the file to the resources folder.</p> <p>Should flow do this if the validator added an error in validation? Am I to remove this myself? Or is this a bug?</p>
