

## TYPO3.Flow - Bug # 57817

<b>Status:</b>	Rejected	<b>Priority:</b>	Should have
<b>Author:</b>	Timo Dödtmann	<b>Category:</b>	Validation
<b>Created:</b>	2014-04-11	<b>Assigned To:</b>	Bastian Waidelich
<b>Updated:</b>	2014-04-11	<b>Due date:</b>	
<b>PHP Version:</b>			
<b>Has patch:</b>	No		
<b>Complexity:</b>			
<b>Affected Flow version:</b> Flow 2.0.0			
<b>Subject:</b>	StringLengthValidator accept empty value, although the "minimum" option is greater than "0"		
<b>Description</b>			
For the StringLengthValidator the property "acceptsEmptyValues" is set to "TRUE", even if the "minimum" option is greater than "0". So, if a empty string is validated, where the minimum option is set set to e.g. "1", the StringLengthValidator doesn't generate a error.			

### History

#### #1 - 2014-04-11 08:16 - Gerrit Code Review

- Status changed from New to Under Review

Patch set 1 for branch **master** of project **Packages/TYPO3.Flow** has been pushed to the review server.

It is available at <https://review.typo3.org/29375>

#### #2 - 2014-04-11 10:17 - Bastian Waidelich

- Project changed from *TYPO3.Fluid* to *TYPO3.Flow*  
- Category deleted (*ViewHelpers*)

#### #3 - 2014-04-11 10:21 - Bastian Waidelich

- Category set to *Validation*  
- Status changed from *Under Review* to *Rejected*  
- Assigned To set to *Bastian Waidelich*

Hi Timo,

thanks for reporting, but the current behavior is intended:

Imagine you want to make a property **optional**, but if it is set it has to comply with some rules (e.g. a certain minimum length, an email address).

That's why most of the validators also accept the value to be empty (this is done in most other validation frameworks too). If you want to make a property required, just add the **NotEmpty** validator as well.

#### #4 - 2014-04-11 10:54 - Timo Dödtmann

Hi Bastian,

good point.

Thanks for the review.
