Core - Bug # 58016

Status:	New	**Priority:**	Should have
Author:	Kay Strobach	**Category:**	Extension Manager
Created:	2014-04-17	**Assigned To:**	
Updated:	2014-12-19	**Due date:**	

TYPO3 Version:	6.2
PHP Version:	5.5
Complexity:	easy
Is Regression:	No
Sprint Focus:	
Subject:	module list is not refreshed after installing new extensions

Description

releases: 6.0, 6.1, 6.2

after installing an extension with the 6.x extensionmanger the backend module list in the left is not refreshed.
this was a nice feature in 4.x ...

I think there is just a bit of JS missing

Hm, I already fixed that for 6.0 with issue #42009 - seems like it got removed again...

#2 - 2014-05-13 21:01 - Oliver Hader

- Status changed from New to Needs Feedback

- Is Regression changed from Yes to No

Cannot reproduce with TYPO3 CMS 6.2.

Can you please provide a screenshot to ensure that we're talking about the same?

I e.g. installed and uninstalled the documentation module which perfectly appeared and disappeared in the module menu on the very left side of the
TYPO3 backend.

#3 - 2014-05-20 09:18 - Kay Strobach

works if you download from TER
but not if you upload from your PC

#4 - 2014-09-19 15:45 - Alexander Opitz

Hi,

was this issue fixed with TYPO3 6.2.4 or does it still exists?

#5 - 2014-09-19 15:46 - Kay Strobach

sometimes that behaviour is still there, but not always, one case is if you change the settings and "enable / disable" a module, but that's not the typical case ... happens during pure installation as well ..
