

Base Distribution - Task # 58186

Status:	Needs Feedback	Priority:	Must have
Author:	Peter Schuhmann	Category:	
Created:	2014-04-25	Assigned To:	Peter Schuhmann
Updated:	2014-04-25	Due date:	
Subject:	Neos with HTTPS not possible		
Description			
All template resources (css, js...) are included with baseurl including "http://" which will result in an "insecure content" error.			
Fix could be to include all resources without baseurl and/or without "http:"			

History

i guess this problem does not appear if you use neos with https all the time. we switch to https running on live-web that's why we have to deal with this it.

#2 - 2014-04-25 11:53 - Adrian Förder

- Status changed from New to Needs Feedback

- Assigned To set to Peter Schuhmann

do you have some reverse proxy in front of your installation? Usually HTTPS works just fine...

Do you use the (deprecated) f:base ViewHelper?
