<b>Subject:</b>	Inflection viewhelper doesn't work anymore		
<b>Description</b>			
<p>While building models (and also kickstarting other types of classes) the placeholders in the Fluid template are not replaced by their real value anymore:</p>			
<pre>/**  * A {k:inflect.humanizeCamelCase("{modelName}")}  *  * @version \$Id: \$  * @license http://www.gnu.org/licenses/gpl.html GNU General Public License, version 3 or later  * @scope prototype  * @entity  */ class Paper {      /**      * The {k:inflect.humanizeCamelCase("title" lowercase="true")}      * @var string      */     protected \$title;</pre>			
<p>Maybe the view helpers don't work with the current Fluid API anymore?</p>
