

TYPO3.Flow - Task # 58408

Status:	New	Priority:	Should have
Author:	Carsten Bleicker	Category:	
Created:	2014-05-02	Assigned To:	
Updated:	2014-05-02	Due date:	
Sprint:			
PHP Version:			
Has patch:	No		
Complexity:			
Subject:	Disable manually persisting		
Description			
<p>HTTP says, no writing if GET. But in Neos f.e. there are several places using hard/manualy persisting somewhere inside the job stack. You can send f.e. a GET request to a NodeController wich moves an entity. The persistence is invoked manually.</p> <p>I dont want to worry about sending GET Requests to the server. I want to be sure "Okay, if you send GET, definitely NOTHING will happen to the system".</p> <p>So imho \$this-persistenceManager->persistAll() f.e. should not be possible in safe requests. Strictly throw Exception.</p>
