Subject:	Can not translate flexform FAL elements in Typo3 6.2.1

Description

Translation of FAL elements in flexform causes bug in typo3 6.2.1.

I've created a new plugin content element which contains IRRE fields (FAL field) in plugin options (flexform). Added some images using IRRE field. After that translated the CE to another language. CE is localized, but IRRE elements are not.

Hi, thanks for the report.

isn't it a duplicate of https://forge.typo3.org/issues/56882 ?

can you please check if solution from https://review.typo3.org/#/c/32986/ fixes the issue?
