Core - Bug # 58576

Status:	Resolved	**Priority:**	Must have
Author:	Ivo Benner	**Category:**	Import/Export (T3D)
Created:	2014-05-06	**Assigned To:**	Wouter Wolters
Updated:	2014-05-06	**Due date:**	

TYPO3 Version:	6.2
PHP Version:	5.4
Complexity:	
Is Regression:	Yes
Sprint Focus:	

Subject:	Cannot export content elements anymore

Description

When I try to export some content in the Typo3 Backend I get the following error message:

> #1: PHP Catchable Fatal Error: Argument 2 passed to TYPO3\CMS\Backend\Utility\IconUtility::getSpriteIconForRecord() must be of the type array, null given, called in /var/www/t3versions/typo3_src-6.2.1/typo3/sysext/impexp/Classes/Controller/ImportExportController.php on line 583 and defined in /var/www/t3versions/typo3_src-6.2.1/typo3/sysext/backend/Classes/Utility/IconUtility.php line 723 (More information)

> TYPO3\CMS\Core\Error\ErrorHandler::handleError(4096, "Argument 2 passed to TYPO3\CMS\Backend\Utility\Ico…ImportExportController.php on line 583 and defined", "/var/www/t3versions/typo3_src-6.2.1/typo3/sysext/backend/Classes/Utility/IconUtility.php", 723, array)

> TYPO3\CMS\Backend\Utility\IconUtility::getSpriteIconForRecord("tt_content%3A2", NULL)

I did some logging inside ImportExportController.php and found some sort of missing URL decoding or double encoding problem:

Here is what $inData and the GET-Param tx_impexp in the ImportExportController.php looks like:

> Array ([action] => export [record] => Array ([0] => tt_content%3A2) [external_ref] => Array ([tables] => Array ([0] => _ALL)))

My URL in the Browser-Frame:

> http://.../typo3/mod.php?M=xMOD_tximpexp&moduleToken=a10ff0b5cf0dd89e7ddcd8dbebb725e90a48a986&tx_impexp%5Ba ction%5D=export&tx_impexp%5Brecord%5D%5B0%5D=tt_content%253A2&tx_impexp%5Bexternal_ref%5D%5Btables%5D%5B0%5D=_ 5B0%5D=_ALL&id=2

For some reason its "tt_content%3A2" and not "tt_content:2"
Thats why all subsequent attempts in the code to explode the string by ":" fail and the error is thrown.

As far as I can tell the Error exists since I updated my Typo3 website from 6.1 to 6.2.

Any idea why this URL-encoding bug might happen ?

Revision bc1f2642 - 2014-05-06 23:19 - Wouter Wolters

[BUGFIX] Fix exporting content elements

Exporting a content element leads to a fatal error.

A wrong url encoding is the cause of the problem.
