Sprint Focus:	

Subject:	jQuery tabs pollution

Description

The first list (<ul>) you output from class.ext_update.php gets converted to jQuery tabs.

This forces you to use tabs, even if you don't want to.

(or use this workaround:

```
$content .= '<script
type="text/javascript">jQuery(function(){jQuery("#typo3-extension-configuration-forms").tabs("destroy");});</script>';
```

)

this can be easily fixed by removing the call to:

```
$("#typo3-extension-configuration-forms").tabs();
```

Possible regression to: https://review.typo3.org/#/c/16780/8/typo3/sysext/extensionmanager/Resources/Private/Templates/UpdateScript/Show.html

or: https://review.typo3.org/#/c/15828/20/typo3/sysext/extensionmanager/Resources/Public/JavaScript/main.js

Either the markup is wrong (id attribute that should only be used with extension configuration forms) or the JS is wrong.
