Has patch:	No		
Complexity:			
Affected Flow ve	ersion: Git master		
Subject:	Can not split configuration in settings.yaml		
Description			
Hi			
I don't know if this	s is a bug. If not, please close this tid	cket.	
I tried to organize	a little my settings.yaml by grouping	g some parts of the configuration into main entries.	
But, then I notice	d that "excludeClasses" were not an	ymore taken into account by the reflection service.	
TYPO3.Flow's su	b-entries were totaly empty.
