

TYPO3.Fluid - Feature # 58829

Status:	Closed	Priority:	Should have
Author:	Bastian Waidelich	Category:	Core
Created:	2014-05-15	Assigned To:	Marc Neuhaus
Updated:	2014-12-08	Due date:	
Has patch:	No		
Subject:	Register package namespaces automatically		
Description			
<p>Currently when using ViewHelpers from 3rd party packages the package namespace has to be registered:</p> <pre>1{namespace xyz=Acme\SomePackage\ViewHelpers} 2<xyz:someViewHelper /></pre> <p>It would be useful if the namespace of all 3rd party packages containing at least one ViewHelper would be registered automatically (in addition to the explicitly registered namespaces) .</p> <p>For the above example that would mean:</p> <pre>1<acme.somepackage:someViewHelper /></pre> <p>Would be sufficient, if SomeViewHelper resides in a sub-namespace "ViewHelpers" as suggested.</p>
