[BUGFIX] Fix import for fields of type input with link wizard

Fields of type import and link wizard could also contain a path to a local file in addition to a direct file reference (file:42). The refindex correctly analyse this relation and saves a db relation to the uid of the sys\_file records.

On imports this is not correct resolved back, but a value "sys\_file\_{uid}" is saved.

In addition this patch fixes also a redundant inclusion of files stored in fileadmin for such a field type, because of having a sys\_file db relation and a softreference.

Resolves: #58843

Releases: master, 6.2
