TYPO3.Flow - Bug # 58927

Status:	New	**Priority:**	Should have
Author:	Sven Radetzky	**Category:**	Security
Created:	2014-05-19	**Assigned To:**	
Updated:	2014-05-19	**Due date:**	

PHP Version:	5.4
Has patch:	No
Complexity:	
Affected Flow version:	Git master

Subject:	Overlapping ressouce definitions in Policy.yaml resolved incorrectly

Description

Just encountered this particular bug while updating a Policy.yaml file.

If you have two ressource definitions that overlap:

```
ressources:
 methods:
  allMethods: 'method(Vendor\Ext\Controller\SomeController->.*Action())'
  specificMethod: 'method(Vendor\Ext\Controller\SomeController->specificAction())'
```

And acls similar to this:

```
acls:
 OneRole:
  methods:
   allMethods: GRANT
 SecondRole:
  methods:
   specificMethod: GRANT
```

Then the second role can not access the specific method. By votes (0 denied, 0 granted, 1 abstained). The interesting part is when you execute

```
./flow security:showeffectivepolicy Vendor.Ext:SecondRole
```

The output says that specificMethod is allowed for SecondRole.

So even if this behavior is intended there is a bug in the SecurityCommandController at the very least.

PS:

Affected Flow Version: 2.1.2

Although this version or any version beyond 2.0.0 does not actually exist here in forge.
