TYPO3 Version:	6.2
PHP Version:	5.4
Complexity:	
Is Regression:	No
Sprint Focus:	

Subject:	Content element Media: 2 bug with External URL in 6.2.2: wrong http:// handling

Description

Take a External video URL like

http://www.youtube.com/watch?v=ow7eEWh37iU

In fresh clean working typo3 6.2.2 with IntroPack:

+ Add Media content element.

+ Goto Video Element and add External URL using the icon(!) "Select file or URL".

+ Notice the http:// in front of the complete URL

+ Set Link

+ Notice the http:// is not longer there in the "Path or URL to fallback ..."

Look at rendered code on the FrontEnd:

No object code is rendered at all.

Readd the http:// directly in the

"Path or URL to fallback ..." (without using the icon)

Look at rendered code on the FrontEnd again:

Now you will see no video, but at least the object-code is rendered.

(See bug 1: data-value is useless for viewing video in browser)
