Subject:	[Aloha editor] Add custom formats and styles		
Description			
<p>The goal of this feature is to add new customs formats and styles for Aloha editor.</p> <p>All following changes are presents in the attachement files.</p> <p>I created new Aloha plugin include in a new Neos package :</p> <ul style="list-style-type: none">- Packages/Application/AlohaPlugin.ExtraFormats/Resources/Public/AlohaExtraFormatsPlugin/lib/extra-formats-plugin.js <p>His role is to get the original Format plugin and adding new styles in it.</p> <p>Each styles is associated with a class attribute, which is define in a .css file associated with the plugin.</p> <p>I decided to create my plugin in external package to reduce the impact in Neos core, because you can adapt the plugin for your needs.</p> <p>To add the new formats, I needed to add some feature not fully implemented.</p> <p>I implement the "addButton" function in this two files :</p> <ul style="list-style-type: none">- Packages/Application/TYPO3.Neos/Resources/Public/JavaScript/LibraryExtensions/UiAlohaPlugin/multiSplit.js- Packages/Application/TYPO3.Neos/Resources/Public/Library/aloha/aloha.js <p>I needed to load my Aloha plugin dynamically. I implement this feature in the aloha configuration and in yaml configuration :</p> <ul style="list-style-type: none">- Packages/Application/TYPO3.Neos/Resources/Public/JavaScript/aloha.js- Packages/Application/TYPO3.Neos.NodeTypes/Configuration/NodeTypes.yaml <p>With this feature you can add new Aloha plugins dynamically for specific nodes.</p> <p>The yaml configuration is only there as example, you can implement every Aloha plugins you need.</p>
